AROUND

YOU

Delivering exceptional services to our customers, from our by design Tier III data centre located in the South West, UK.

WHY CHOOSE US?

We're capable, transparent and can adapt to your needs.

We know how important it is to have a good match between capability and scale. We've been providing professional data centre services for many years. Regardless of any legacy or complexity issues, we'll manage your IT environment. You don't need to spend long hours at the data centre as we are able to provide any assistance you need. We also offer free-of-charge tooling, setups and configuration with our longer term contracts.

OUR OFFER

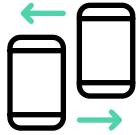

- **Transparent Total Cost of Ownership**
- **Increase your uptime and compliance**
- **UK Data Sovereignty guaranteed**

From co-location and private cloud to multi-cloud and network infrastructure services, whatever you need, we have the solution.

Our team of professionals work closely with your business. We offer a tailored service collaboratively building an IT environment that is right for you.

OUR SERVICE

INDECTRON PROVIDES PREMIUM CARRIER NEUTRAL COLOCATION DATA CENTRE TECHNICAL SPACE TO SERVICE PROVIDERS, ENTERPRISE, MEDIA, EDUCATION, HEALTH CARE AND GOVERNMENT ORGANISATIONS. OUR DATA CENTRES ARE USED AS PROTECTED ENVIRONMENTS FOR DATA AND CRITICAL SYSTEMS CONNECTED WITH A WIDE RANGE OF NETWORKS AND CLOUD SERVICE PROVIDERS.

NETWORK & COMMS

Indectron have the capability to build optical networks across multiple carriers using our network security skills and software defined technologies for integration with multi-cloud environments.

Our aim is to reduce barriers to entry, lower expenditure thanks to reduced transit costs for local ISPs and increase competitiveness within customer markets. This has helped to create a digital infrastructure that supports and encourages expandable business growth.

Indectron have the capability to build optical networks across multiple carriers and network technologies using our network security design skills for your private, hybrid or multi-cloud environments.

- Dual Secure Carrier Entrance Points
- Carrier Neutral Facility
- Diverse A+B Meet-Me Rooms
- Inter- Customer Cross-Connect Ability
- Point- to- Point Inter- Data Centre Links

DATA CENTRE

Our own data centre is Tier III by design, located in Gloucestershire, guaranteeing Tier I connectivity and the highest levels of uptime.

To ensure high availability we have invested millions of pounds into our data centre and network connectivity within Gloucestershire. This gives you IT infrastructure that is monitored for accuracy and value 24/7 x 365. All backed by a first class customer service team.

We have hosted, migrated and designed countless secure systems and understand best practice in networks and cyber security. With accreditations in security standards such as ISO27001 and PCI DSS we can advise you on system design, security testing, developing quality procedures and gaining your own accreditations.

At Indectron we help you get the most out of your technology from our customer centric team.

PRIVATE & MULTI-CLOUD

Build hybrid platforms to deliver enterprise class IaaS, integrating with cloud platforms in a scalable deployment model.

With Indectron's experience and expertise you can take advantage of a proven transition and delivery model to speed up your journey to an integrated and automated IT environment.

By opting the Indectron ecosystem, build your multi-cloud solution and transition to a true cloud services delivery model, but within the framework of a flexible multi-vendor environment that can operate regardless of where IT resources are located or who they are owned or run by.

We offer our customers a highly flexible, cost-effective IaaS solution making it simple to control how you provision your workload delivered by our partner network.
